

HEAVY-DUTY TROLLEY FOR PROFESSIONAL COFFEE MACHINES AND EQUIPMENT

with pneumatic wheels

This heavy-duty handling trolley is the indispensable tool for every technical assistance van, workshop, and warehouse. Engineered to optimize the workflow of HoReCa technicians, it allows for the seamless transport, lifting, and installation of professional espresso machines and heavy components in total safety and autonomy.

Maximum Safety & Injury Reduction:

Eliminates manual lifting, significantly reducing technician fatigue and the risk of back injuries.

Boosted Productivity:

A single technician can manage operations that would otherwise require two people, cutting operational costs in half.

Total Equipment Protection:

Premium pneumatic wheels absorb terrain vibrations, preventing shock and impact damage to sensitive internal machine components.

Fields of Application and Versatility

- In the Workshop and Warehouse: For the rapid movement of boilers, water softeners, and heavy components in a single trip.
- During Transit: Simplifies loading and unloading from the service van thanks to the table-height Roll-Off platform.
- At the Customer's Premise: Ideal for direct installation and technical assistance right at the bar or restaurant counter.

Technical Specifications

Specification	Detail
Maximum Load Capacity	Up to 220 kg (485 lbs)
Loading Platform Dimensions	122 x 66 cm
Loading Height	From 70 cm to 93,5 cm
Wheel Type	High-vibration-absorption pneumatic wheels
Special Feature	Roll-Off system with tilting and sliding platform
Recommended Applications	Espresso machines, coffee grinders, water softeners, glasswashers and slush machines.
